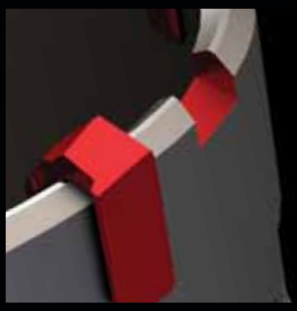
CRUSHER

CARBIDE CORE BITS
COMPATIBLE SDS-PLUS

SIMPLE USE
FOR INTENSIVE WORK !

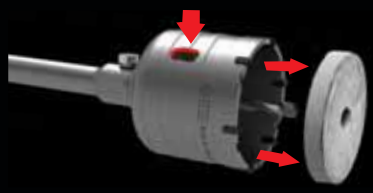


FAST

STRONG

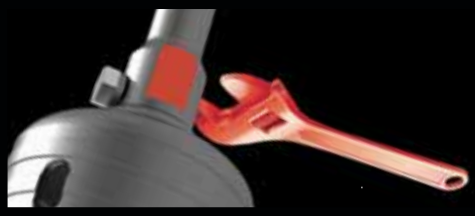
Copper brazed carbide teeth for heat resistance up to 1200 degrees. Patented technology to keep dust away from the inserts.

PRATICE



Easy core extraction thanks to oblong drain hole.

EASY



Easy removal of the centring drill with a hexagonal key via the hexagonal screw and of the bit holder with an adjustable spanner via the flat.

KIT

Core bits and accessories available separately or as a complete kit assembled and ready for use.

CARBIDE CORE BIT WITH M16 ATTACHMENT FOR LARGE-DIAMETER DRILLING.

Its high quality steel and carbide and its patented dust-release technology close to the teeth giving it extreme durability and optimal drilling speed. Ideal for electrical and plumbing work: installing electrical boxes, pipe routing.

Core bit kit CRUSHER
Core bit + drill bit holder with ready-to-use centering

Description
- Premium carbide teeth brazed with copper at high temperature.
- High strength treated steel.
- Patented technology for releasing dust near the pads.
- Drilling depth 50mm.
- Oblong core evacuation hole.
- M16 attachment.

Benefits
- Ideal for large diameter drilling.
- Extreme lifespan.

High drilling speed.
Practicality of use: significant useful length, dismantling possible, easy carrot extraction.
d'extraction de la carotte.

Applications
- Box installation electrical in the masonry.

Concrete, Stone, Brick, Breeze block, Holow brick
