

Pendant rail 3000 mm

E-no — MP-no 910Z4

Pendant rail for mounting cable ladders, wire mesh trays and cable trays that are suspended from the ceiling. Used together with ceiling bracket and support yoke. The pendant rail is made of a zinc-magnesium alloy (25 µm) and is suitable for environmental class max C4. The advantage of this material is that it self-heals, for example when cut, and is a more durable alternative to traditional hot-dip galvanising. To join a pendant rail, you can either mount back-to-back, use a pendant splice or use a piece of 21x41 mm anchor rail. Several support yokes can be mounted on the same pendant. Cutting instructions are available for c-c 100 mm.
