Instruction manual - 1/2

IMPORTANT SAFETY INSTRUCTIONS

READ AND FOLLOW ALL SAFETY INSTRUCTIONS

MAY ONLY BE ASSEMBLED TO 100 METRES USING CABLE WITH 2 RESISTORS. RANCEO ITEM NO. 9502. MUST BE COMPLETELY ROLLED OUT BEFORE USE

These products may represent a possible shock or fire hazard if improperly installed or attached.

Products should be installed in accordance with these instructions and current electrical codes.

To reduce the risk of fire, electric shock or injury to persons, make sure that the electrical power to the fixture is disconnected at the source prior to installation or servicing.

DO NOT!

Do not bend the See Snake to a diameter less than 25 mm.

Do not fold a sharp corner on the See Snake.

Do not bend LED Strip Light horizontally.

Do not put excessive pressure on the surface of the strip light (e.g. glass/acrylic panes, etc.).

- LED Strip Light can only be bent vertically, not horizontally
- Unbalanced voltage drop can cause hazardous overload and damage the flexible light
- Do not route the cord or flexible lighting through walls, doors, windows, or any part of the building structure
- Do not cover this product as the covering may cause the flexible light to overheat, melt, or ignite.
- Secure this flexible light using only the hangers or clips provided. Do not secure or permanently attach this product or its cord to the building structure with staples, nails, or similar means that may damage the insulation.
- Follow instructions carefully when splicing sections of flexible light or attaching power cords. Ensure that all connections, including the end cap on the last segment, are properly installed with dielectric grease and shrink tube to preclude the entrance of water, especially in outdoor applications.
- **DO NOT EXCEED THE MAXIMUM NUMBER OF EXTENSIONS OR FLEXIBLE LIGHT LENGTHS PERMITTED BY THE MARKING.**

ATTACH / DETACH 230 V cable from The See Snake
