/ TOUCH-E

INSULATING GLOVE CLASS 0

/ Standards

Produit normé : EU regulation 2016/425 = PPE Category III
EN60903:2003/IEC60903:2014 = Class 0 (AZC)
EN388:2016+A1:2018 = 1,1,2,1,X
EN 61482-1-2:2008 = Class 1 (4kA)

/ Use

Extremely thin insulating gloves that allow greater dexterity than traditional insulating gloves; the non-slip finish offers an excellent grip for handling the smallest details. The mechanical resistance and class 1 electric arc protection are integrated.

/ Technical specifications

Produit :

- Length : 36 cm
- Size : 8, 9, 10
- Color : Orange
- External finish: non-slip
- Internal finish: chlorinated

Document non contractuel pouvant être soumis à modification sans préavis.

Advantages

• Touch-E gloves are made of natural rubber which has excellent dielectric properties.
• Thanks to the chlorinated finish they are easy to wear. Their ergonomic shape has been designed to adhere perfectly to the hand and guarantee a unique degree of dexterity.
• If the risk analysis highlights greater mechanical / thermal risks, it is possible to double gloves your hands to increase the level of protection.
